Avnet's Smart Warehouse Monitoring powered by IoT and AI

The modern warehouse has evolved into a dynamic hub for streamlined operations, driven by the need for efficiency and cost reduction. Our Smart Warehouse Monitoring solution, powered by Amazon AWS, integrates IoT technologies, Automated Control Systems (ACS), and Warehouse Management Systems (WMS) to optimize operations. The solution offers real-time monitoring of assets, geofencing, and inventory management using beacons and tags, ensuring transparency and security across locations. It enhances operations with proximity marketing, secure building access, authentication verification, and location-aware logistics. With features like smart logistics, workflow optimization, contact tracing, and keyless entry, the solution improves worker safety, prevents inventory shrinkage, and optimizes storage and pallet movements.

Product Overview

Avnet's IoTConnect is a comprehensive solution accelerator software that facilitates IoT device connectivity, real-time monitoring, and advanced analytics. It offers seamless device integration, robust security, and easy and clear methods to gain valuable insights for businesses to optimize operations and drive innovation. With diverse connectivity options, strong data protection measures, and true scaling capabilities, IoTConnect empowers organizations to leverage the full potential of IoT technology and accelerate digital transformation.

IoTConnect's comprehensive ecosystem and pre-built solutions reduce the time and effort required to bring IoT products and services to market.

Pre-connected device enablement: Easily connect and manage IoT devices without complex configurations.

Application accelerators and integrations: Through APIs, these accelerator templates focus on end applications giving a prebuilt, head-start for any solution design.

Advanced data analytics: Gain valuable insights from IoT data through real-time monitoring and customizable dashboards.

Robust security measures: Industry-standard protocols and encryption mechanisms ensure the security of data transmission and device authentication.

Deployment Manager capabilities: OEM's can deploy custom products and solutions within IoTConnect and have instant access to features like subscription management, billing and support.

Highlights

- Simplified IOT deployment: IoTConnect offers a user-friendly interface that simplifies the deployment of IOT solutions, enabling businesses to quickly connect and manage devices without complex setup processes.
- Scalability and flexibility: With IoTConnect, businesses can seamlessly scale their Global IOT deployments to accommodate growing needs. The enablement suite supports a wide range of devices and protocols, allowing for flexibility and interoperability across diverse environments.
- Powerful data insights: IoTConnect provides robust analytics and data visualization tools, empowering businesses to gain valuable insights from their IOT devices. Real-time monitoring and predictive analytics enable proactive decision-making and optimization of operations.

Smart Warehouse Monitoring Solution

Avnet's Smart Warehouse Monitoring Solution leverages /IOTCONNECT, powered by AWS and connected technologies to transform modern warehouses into dynamic, efficient hubs. As warehouses shift from being simple storage facilities to complex operational centers, organizations are adopting IoT-enabled Automated Control Systems (ACS) and Warehouse Management Systems (WMS) to optimize efficiency and reduce costs.

Reduced warehouse operating costs

Effective, real-time location tracking

Integration with warehouse management systems

Improved operational efficiency

Optimization of location bin & space utilization

Enhanced forecasting accuracy

Features

Our Smart Warehouse Monitoring Solution is designed to help organizations keep an automated track of all inventory-related activities. Our solution facilitates business managers to achieve increased profitability, performance and accuracy as well as provide widespread support for fleet management to enhance logistics.

- Smart warehouse management
- Warehouse pallet tracking & monitoring
- Environment & storage area monitoring

Solution Architecture - Smart Warehouse Monitoring

powered by /IOTCONNECT

Smart Warehouse, Asset & Worker Multi-Partner Solution

SITUATION:

IOSEA is a private company focused on developing precision indoor location technology. IOSEA’s asset tracking sensor is designed to provide real-time location data, enabling businesses to track and manage their assets more efficiently. The sensor uses advanced electromagnetic and signal processing algorithms enabling high accuracy and scalability.

VALUE PROPOSITION:

- Target Customers
 - Cruise lines, warehouses / cross-docks, mines, and other use-cases requiring dead-reckoning, locations where a GPS fails inside facilities)
- >100,000 connected devices
- Multi-Partner Engagement (IOSEA, Avnet, Nordic, Renesas, Panasonic (Silicon Labs, Ublox)

BEACONS & TAGS	NETWORKING & HOME DEVICES	SMARTPHONES & WEARABLES
• Asset Management tracking against theft, geofencing, inventory management • Proximity Marketing contextual marketing, behavioral analytics • Access Control secure building access • Authentication Verification verification of person or asset location	• Real-Time Location System way-finding, indoor navigation, finding objects • Operations and Logistics smart logistics, location-aware scheduling • Device/Process Automation track and trace, workflow optimization and safety	• Contact Tracing / Social Distancing safety and workflow optimization • Smart Surroundings location-aware devices • Keyless Entry secure multi-point verification • Augmented Reality interact with others through context awareness

IOTCONNECT ENABLED SOLUTION OUTCOMES:

Data science and IoT-enabled solution that provides information of Asset & People Monitoring

Monitor all major assets within a facility to increase operational efficiencies

Customized Experience with Avnet’s Acceleration Frameworks

Ability to find improvement opportunities in the facility to generate safety compliance reports

/ Summary & Next Steps

Benefits

1. **Easy implementation:** Our Smart Warehouse solutions are powered by a modern networking infrastructure platform that works with the current system with minimal disruption.
2. **Accelerate ROI:** Our solutions feature state-of-art technologies such as advanced analytics, deep learning and artificial intelligence that provide real-time visibility and simplify the implementation of higher ROI solutions.
3. **Comprehensive security:** We follow best practices to ensure that all data are properly secured by following the highest standards in compliance with various industry and federal regulations.

Outcomes

1. **Enhanced Operational Efficiency:** Integrates IoT, ACS, and WMS for real-time monitoring, inventory management, and workflow optimization, streamlining warehouse operations.
2. **Improved Security and Transparency:** Utilizes geofencing, beacons, tags, secure building access, and authentication to ensure transparency and security across locations.
3. **Increased Worker Safety and Loss Prevention:** Features like proximity marketing, contact tracing, and keyless entry improve worker safety, prevent inventory shrinkage, and optimize storage and pallet movements.

Avnet's Smart Warehouse Monitoring powered by IoT & AI

Challenges

Perform smarter, streamline business processes and maximize space utilization

Today, warehouses are more than storage and inventory facilities. Many organizations are therefore investing in IoT-enabled warehouses for better automated control systems (ACS) and warehouse management systems (WMS) to improve their operational efficiency by reducing costs. Our Smart Warehouse Monitoring solution enables real-time monitoring of warehouse assets/equipment by providing transparency and traceability of all goods across different locations. The collected data generates meaningful insights on the status of inventory and storage and gives visibility of the stock. It helps the warehouse operator to prevent inventory shrinkage and improves the safety of workers. Such valuable insights also help to optimize storage locations, pallet journeys, warehouse throughput and workforce.

Avnet IoTConnect Solution

Take your warehouse operations to the next level using IoT

Avnet's Smart Warehouse Monitoring Solution leverages Amazon AWS and IoT technologies to transform modern warehouses into dynamic, efficient hubs. As warehouses shift from being simple storage facilities to complex operational centers, organizations are adopting IoT-enabled Automated Control Systems (ACS) and Warehouse Management Systems (WMS) to optimize efficiency and reduce costs.

Benefits

- Reduced warehouse operating costs
- Improved operational efficiency
- Effective, real-time tracking
- Integration with warehouse management systems
- Optimization of location bin and utilization
- Enhanced forecasting accuracy

Highlights

[/IOTCONNECT Quick Start
Development Kits](#)

/IOTCONNECT Quick Start Enablement

IoTConnect Guides are available today on the following development kits:

ST Discovery Kit for IoT node with STM32U5 series

This development kit features Wi-Fi, Bluetooth, a number of sensors and support for expansion through Arduino, STM32+ and Prox™ interfaces. Engineers can use this kit to develop connected devices such as wearable sensors, as well as smart home or smart industry applications.

[LEARN MORE](#)

Microchip WIF32-IoT Development Board

This development board features the PIC32MZ10 Wi-Fi module with PCB antennas and TrustZone hardware security enabled. Additional interfaces, including MicroBLU™, enable the developer to quickly add sensors, a perfect IoT development platform. Get started with a smart monitoring solution using the on-board temperature and light sensors.

[LEARN MORE](#)

Avnet MaaXBoard SBC based on NXP i.MX 8M

Based on NXP's i.MX 8M processor-based single board computer, this kit is perfect for smart devices at the edge. It offers the power to process both video and audio locally and run high level operating systems (Android, Windows, IoT Core, Linux).

[LEARN MORE](#)

Renesas CK-RX65N Cloud Kit Based on RX65N MCU Group

This kit combines the RX65N MCU with an LTE Cellular CAT-M1 module and Ethernet connectivity. With IoTConnect support, you start capturing data in the field and send to the cloud in minutes.

[LEARN MORE](#)

Infineon XENSIV Kit with PAS CO2 sensor

The XENSIV™ connected sensor kit is ideal for battery-powered IoT devices. Its small size hides a lot of performance. With both Wi-Fi and Bluetooth connectivity, the kit includes a CO2 sensor and the OPTIGA™ Trust M security device. The kit works with IoTConnect's Secure Device Management features to provide IoT connectivity with total end-to-end security.
